PROJECTS

BetterGoat (Rails, React.js, Redux/Flux)

[Live](#) | [Github](#)

An Evernote clone built with Ruby on Rails, Postgres, React, and Redux architecture

- Uses React's virtual DOM diffing and Flux architecture, through Redux, to dynamically update only the components that are changed to sync UI components and create a seamless UX
- Manages custom user authentication by using BCrypt to securely verify credentials
- Implements CRUD functionalities using asynchronous AJAX calls to retrieve and update objects in the database

Hero Break (Javascript, HTML5 Canvas)

[Live](#) | [Github](#)

Browser based game inspired by Brick Breaker

- Renders multiple elements on HTML canvas at set render speeds to create fluid and dynamic movements
- Perform vanilla DOM manipulation to conveniently implement global event listeners

Mover (Ruby)

[Github](#)

Lightweight MVC framework in Ruby

- Matches HTTP requests to designated view templates using Ruby metaprogramming
 - Adds flash to the browser and implemented to persist only through appropriate cycles
