PROJECTS

BetterGoat (Rails, React, Redux/Flux) | [Live](#) [Github](#)

An Evernote clone built with Ruby on Rails, Postgres, React, and Redux architecture

- Includes custom user authentication using BCrypt gem to securely manage credentials
- Implements CRUD functionalities using asynchronous AJAX calls to retrieve and update objects in the database
- Uses React virtual DOM diffing and Flux architecture through Redux to dynamically update only the components that are changed through CRUD functionalities to sync UI components and create seamless UX

coming soon (Rails) | [Live](#) | [Github](#)
