PROJECTS

BetterGoat (Rails, React.js, Redux)   Live | Github
A note taking and organizational platform inspired by Evernote
- Implements custom user authentication by using BCrypt to securely verify credentials
- Built backend with a RESTful API to implement CRUD functionality using AJAX calls
- Applies React and Redux to dynamically sync instances of note objects upon save within multiple components rendered on the same page
- Employs S3 AWS to save user profile images to increase speed and efficiency

HeroBreak (JavaScript, HTML5 canvas)   Live | Github
Browser based game inspired by Brick Breaker
- Renders multiple elements on HTML canvas at set render speeds through constant time intervals to create fluid and dynamic movement across different platforms
- Built statistics section by implementing jQuery event listeners to dynamically update as changes occur

Mover (Ruby)   Github
Lightweight MVC framework built in Ruby
- Matches HTTP requests to designated view templates using Ruby meta programming
- Sets flash to the client browser and implemented to persist only through appropriate cycles

SKILLS

Ruby	Rails	JavaScript	React	Redux
jQuery	SQL	Git	HTML	CSS

EDUCATION

APP ACADEMY, NEW YORK   **FEB 2017 - MAY 2017**
- Rigorous 1000-hour web development course with a 3% acceptance rate, focusing on OOP, full stack development and best coding practices

BARUCH COLLEGE, NEW YORK   **SEPT 2009 - MAY 2013**
- B.B.A. in Accounting

EXPERIENCE

SAMWOO LLP, NEW YORK   **JUN 2013 - FEB 2017**
- Standardized analytical calculations, such as bank and credit reconciliations, by maintaining excel templates to improve the calculation process and staff readability
